- Cables should be IRWC (Independent Wire Rope Core) with as many strands as possible.
- Wire rope selection for any application for proper safety factor is a customer responsibility.
- Inquire for special rope diameters not listed above.
- Calibration performed with rope diameter specified on order.
- The specified calibration load must not be greater than the capacity of the Cranegard or the working strength of the cable/rope specified with appropriate rating reductions for clamping.
- Factory calibration of switch set point offered at no additional charge. Specify one set point per switch and if load is ascending or descending.
- Capacity ratings of Dillon's calibration slings may prohibit some switch settings with smaller diameter rope. Call the factory for any limitations.
